

## Used Hydco Rig and Support Equipment

Rig is equivalent to Schramm T660 and can be truck or track mounted

**Mounted on a 1998 6 x 6 MAN truck** repainted in 2008.

Rig is powered by a new (zero hours June 2009) Scania 480hp engine and fitted with Foremost rod handler, Remet 4 1/2" RC system, moveable control panel, Mosby breakout, 45° dump mast, SDS fire suppression, 1000 litre fuel tank and survey winch. Extensive rebuilds including Ingersoll-Rand 900/350 deck compressor rebuilt early 2008 and complete new hydraulic pumps and spools middle of 2008 new pullback chains and sprockets and the coolers replaced early 2008. Rewired and rehosed. Has done very little work since these repairs and replacements carried out.

**Air Package** consisting of 1996 6 x 6 MAN fitted with a custom tray with storage ladders and walk around platforms, new Sullair 1150/500 Combo compressor with 150 hours and a Hurricane M41 Booster showing 1000 hours since full rebuild of the air end and guards.

**Rod truck.** 1984 International T Line with Cummins 400hp engine. Set up to suit Foremost rod-handler and includes 3000 litre water tank and 5000 litre diesel tank under the drill rods. Legally carries 240m of drill pipe.

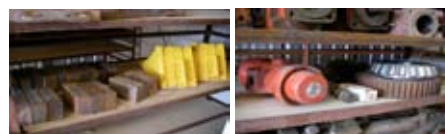

**Price.** Vendor is looking to sell as a package. The price is negotiable around \$1.1 million. Consideration will be give to splitting it up in the three lots described above.

Optional equipment includes...

- Track base that can be changed over in less than half a day.
- 40' trailer with 20' workshop container, bulk fuel tank and rod racks
- 2 axle dog trailer
- 240 metre drill string
- Consumables and spare parts.

**Note:** The two MAN 6x6 trucks are New Zealand compliant. However, due to an Aus bureaucratic decision, they do not have an Australian Design Rule compliance tag.
